"Solutions for your business and academic needs"

About us

Vindilac Analytics is an emerging consultancy firm offering professional services to clients at affordable prices while exceeding clients' expectations. The services offered include academic research assistance, proofreading and editing, mentoring and private tutoring, business, economic and tax advice and motivational speeches. The target group includes students, public institutions, start-ups, micro and medium businesses. Our team consists of experts who are critical thinkers and problem solvers. We aspire to offer value added services that are of great quality and value to clients.

Research

We offer a wide range of research services including proof reading and editing, plagiarism, abstract and concept note, research topic and gap identification, problem statement, regressions, methodology, literature review, interpretation of findings, use of statistical software (Stata, Eviews, R, SPSS) etc.

Mentoring

Our mentorship programme includes goal planning and design, time management, networking skills, drive identification, confidence build-up, public speaking, clear vision, procrastination, daily motivation, emotional intelligence and self-awareness strategies.

Advisory

We provide business advice to start-ups and micro businesses. These include economic, tax and financial advice, competitor analysis, competitive edge, quality service, drafting concrete business plans, financial projections, market analysis, sales and marketing.

Tutoring

We provide academic assistance to students in the form of assignments, exercises and concept clarity. The subjects tutored include Economics, Business management, Accounting, Econometrics, Mathematical economics, Statistics and other commercial subjects.
